

Dover Freight Study

Community Workshop

October 28, 2020

Welcome to the first

Dover Freight Study Community Workshop

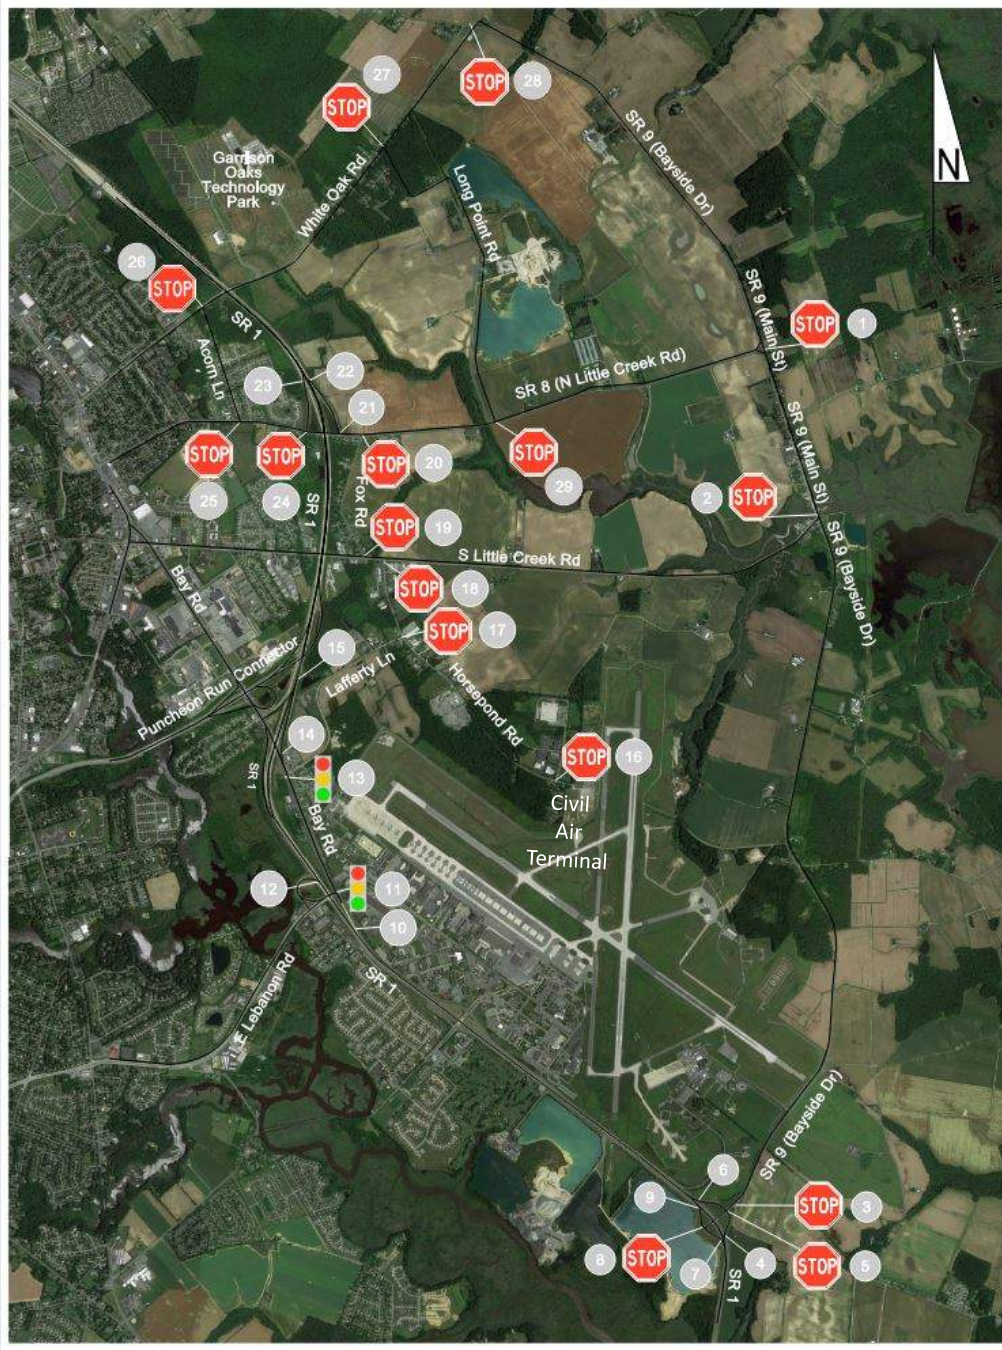

Agenda

- Study Area
- Purpose and Need
- Existing Traffic Summary
- Conceptual Alternatives
- Next Steps

Please review the information and provide feedback.

It is important to us that we hear from you.

Study Area Map

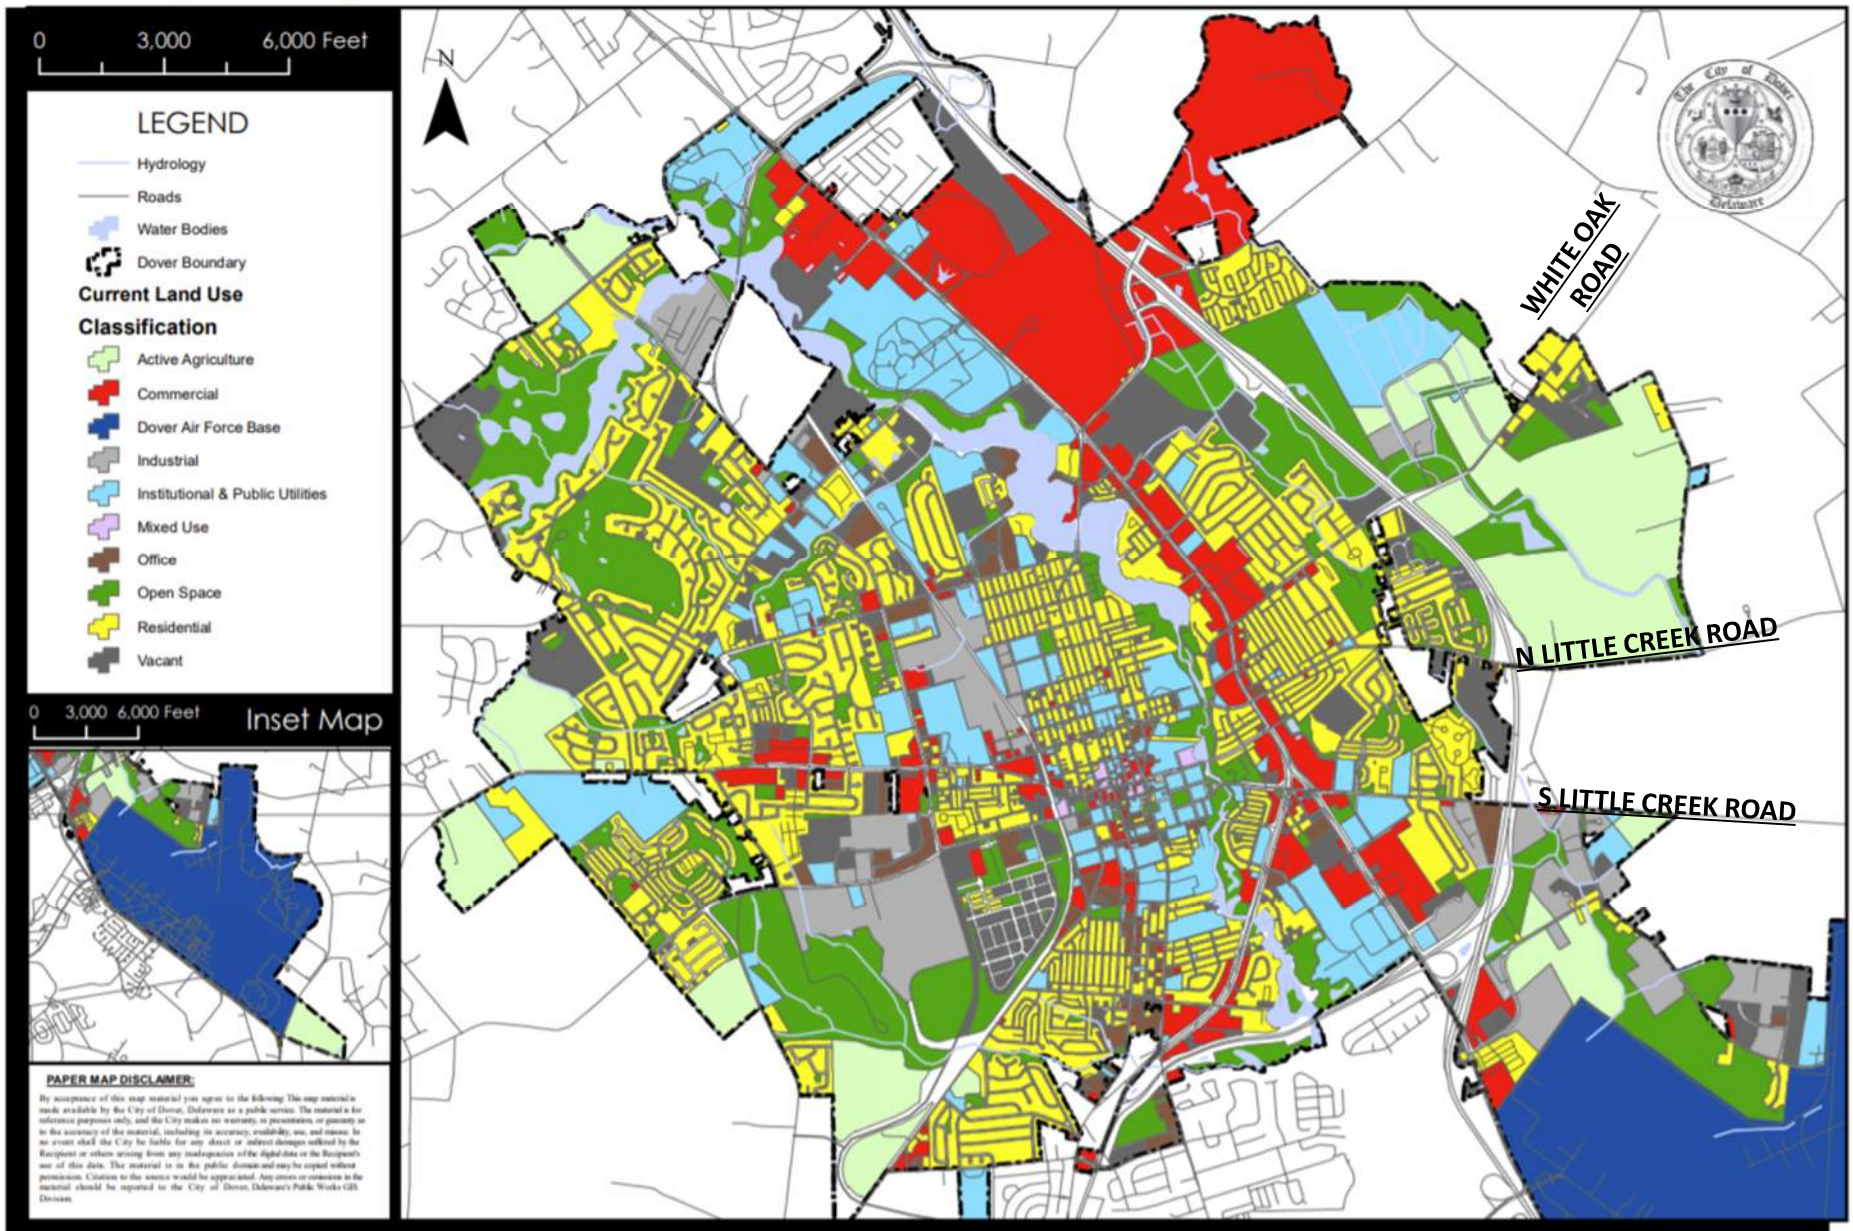

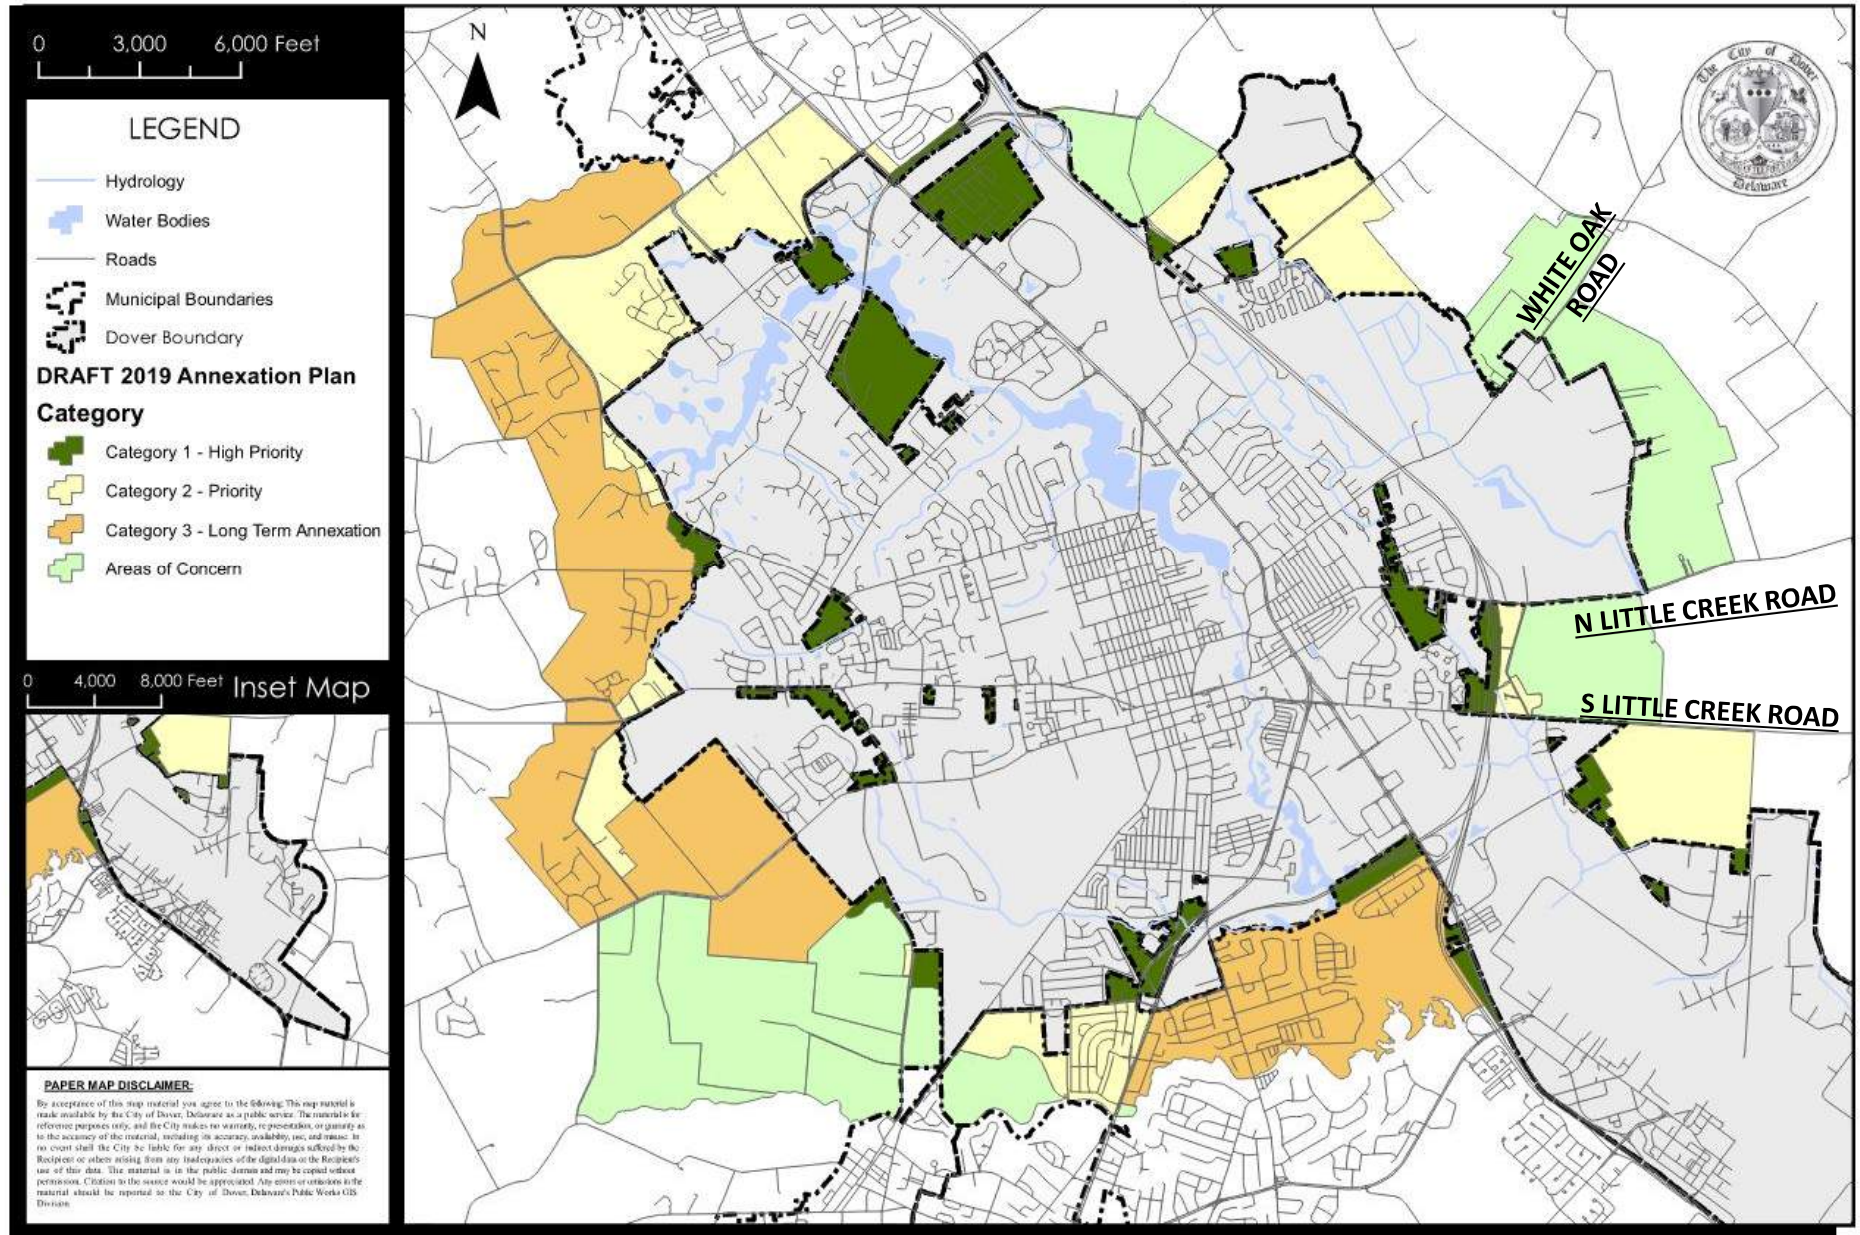

The primary purpose of the Dover Freight Study is to identify improvements that would enhance connections and access to the Civil Air Terminal at the Dover Air Force Base from the regional highway network, as well as, improve connections between the Civil Air Terminal and the Garrison Oaks Technology Park to the north. These improved connections would make both the Civil Air Terminal and Garrison Oaks Technology Park potentially more attractive areas for industries to consider locating. An additional benefit would be the reduction of traffic, particularly heavy-truck traffic, on the area's local roadway network.

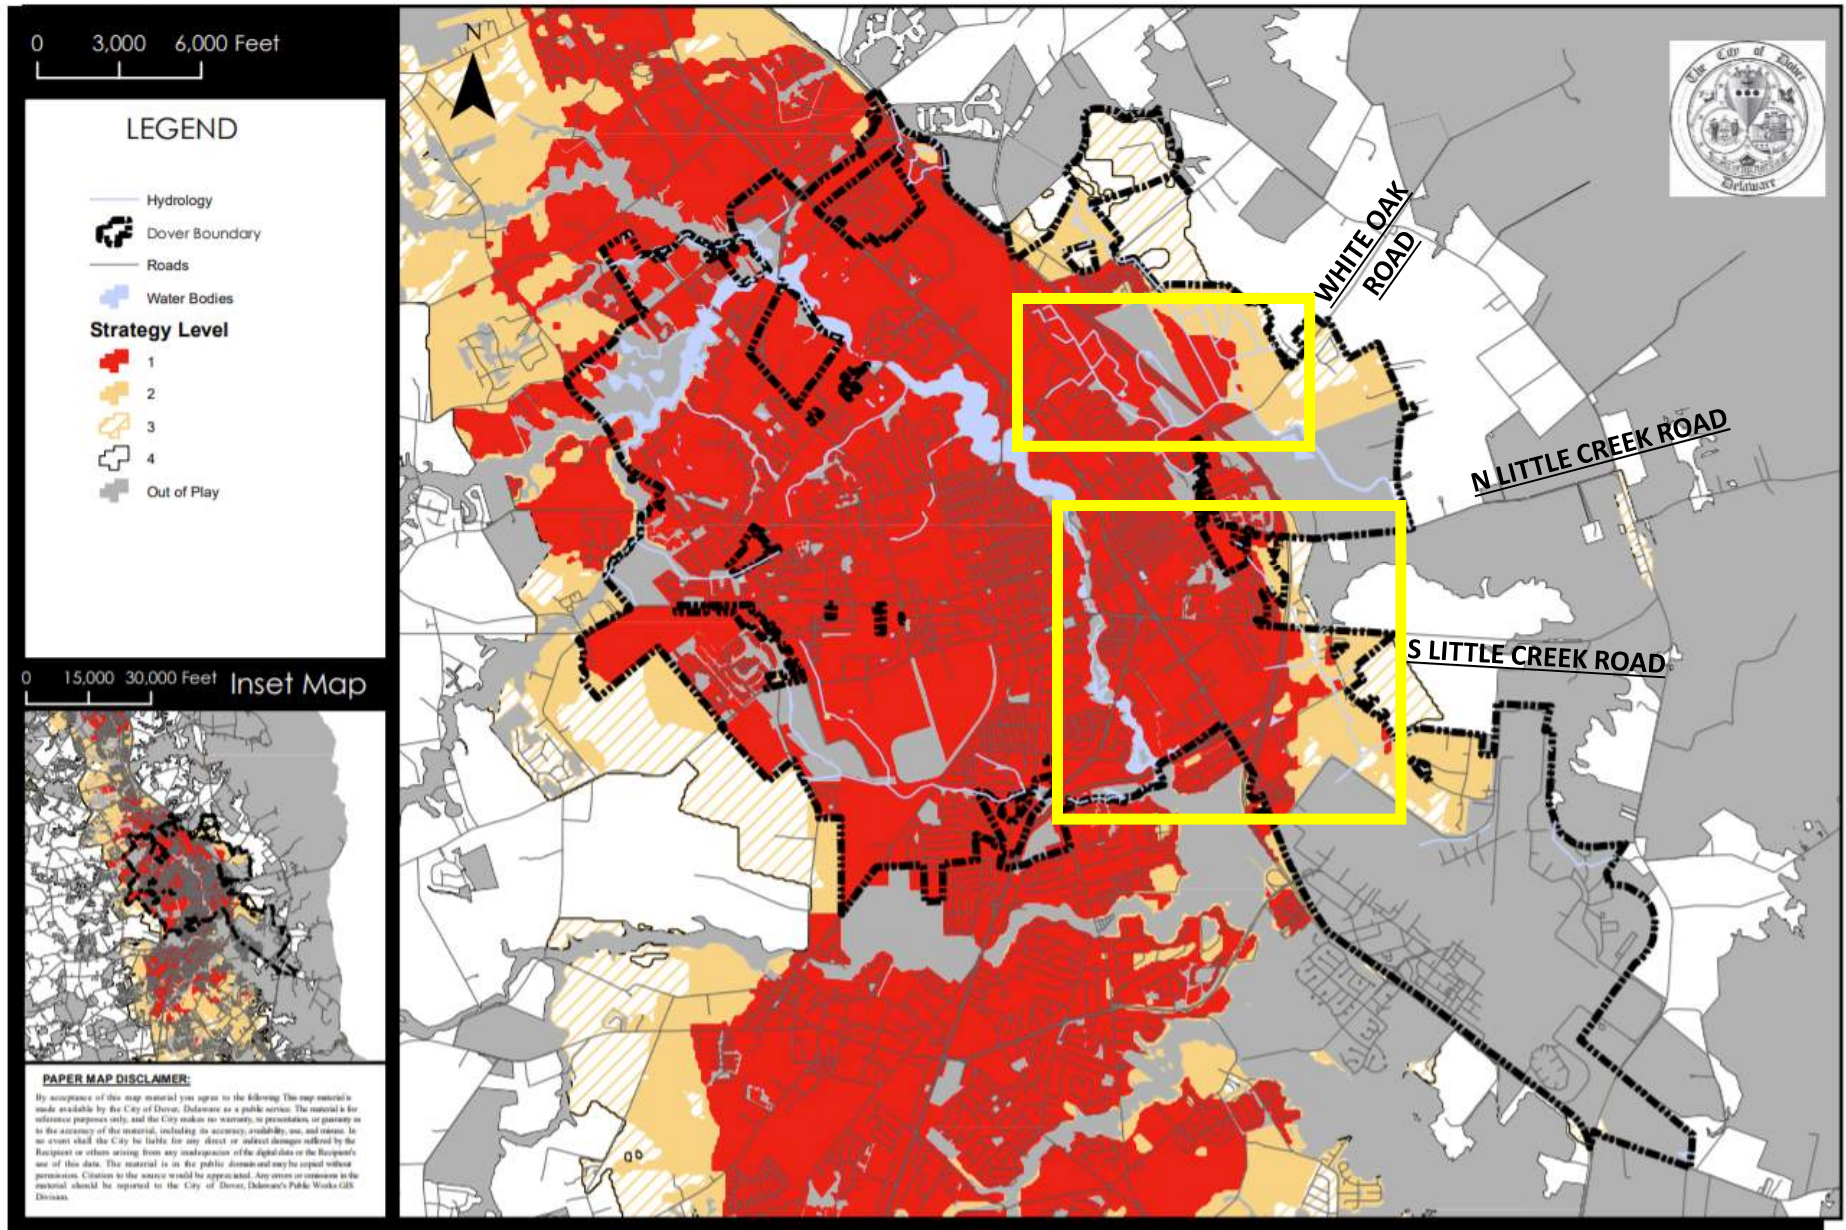

These potential improved connections would support and are consistent with the future land use for the area as identified in both the Kent County and City of Dover Comprehensive Plans.

Purpose & Need Statement

October 2020

Fall 2020

- **Community Workshop #1**
- Project Introduction
- Purpose and Need
- Conceptual Alternatives

Late Fall 2020

- Review Public Comments with Project Management Committee
- Revise Conceptual Alternatives

Winter 2020

- Final Community Workshop
- Final Project Alternatives
- Final Planning and Environmental Linkage Report

Thank you for taking time to participate in today's community workshop.

Your comments are important to us and will be considered along with comments from government and regulatory agencies. Safety and operational requirements will also be taken into account. Therefore, while all comments are considered, some comments may not be incorporated into the project.

Please fill out the survey at the end of this workshop. You could also mail or email comments to:
